

Jaime Andrés Cardona Montero

SOFTWARE ENGINEER | BACKEND, AI & FULL-STACK

Cali, Colombia | (+57) 315 386 3179 | jaimeandrescardonam@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL PROFILE

Systems Engineer focused on backend engineering, AI-enabled products and data-intensive applications. Experience delivering software in public-sector and international remote environments, including nationally deployed solutions at DIAN and backend/API/Elasticsearch work for Opportunity Hound. Current work includes AI software-engineering task creation and evaluation at Alignerr and development of the RCKT web/AI platform. IEEE-published co-author and technical reviewer, with hands-on experience in Python/FastAPI, TypeScript/React, REST APIs, PostgreSQL/Supabase, Elasticsearch, Git/GitHub and Agile/Scrum. English: B2.

PORTFOLIO

<https://portafolio-a6ns.onrender.com/>

COMPETENCES AND TECHNICAL SKILLS

Core Engineering: Python, FastAPI, TypeScript, JavaScript, React, REST API design/integration, SQL.

AI / ML: Machine Learning, Deep Learning, neural networks, LLMs, AI agents, prompt engineering, MCP, AI evaluation and applied automation.

Backend & Data: Java, Spring Boot, C#/.NET, PostgreSQL, MySQL, MongoDB, Elasticsearch, Supabase.

Frontend & Web: React, TanStack Start/Router/Query, Tailwind CSS, Vite, HTML/CSS, Recharts.

Cloud & Delivery: Oracle Cloud foundations, AWS foundations, Docker, Render, Git/GitHub, environment configuration, C4 architecture.

Quality & Collaboration: Software quality principles, code review, QA collaboration, Scrum/Agile, technical documentation, stakeholder communication.

EXPERIENCE

RCKT (rckt.es) | Remote

SOFTWARE ENGINEER - AI PLATFORM / FULL-STACK | Jun 2026 - Present

- Contribute to the architecture and implementation of a TypeScript/React platform integrating AI capabilities and a control center for agent workflows.
- Implement and stabilize AI runtime, chat/agent flows and multi-provider routing, improving reliability and operational control of AI features.
- Work across application and data layers using React 19, TanStack Start/Router/Query, Supabase, Tailwind CSS, Vite and Nitro/Node.
- Maintain Git/GitHub workflows, secure environment configuration and cloud deployment setup.

Alignerr | Remote

SOFTWARE ENGINEER TASK CREATOR | Jun 2026 - Present

- Design and review software-engineering tasks used to evaluate and improve AI systems.
- Assess generated code and technical responses for correctness, reasoning quality, requirement adherence and software-engineering best practices.
- Identify edge cases and quality issues and provide clear technical feedback to improve evaluation quality.

Opportunity Hound (OppyHound) | Phoenix, Arizona, U.S.A. / Remote

SOFTWARE ENGINEER | Sep 2025 - Mar 2026

- Developed and maintained a data-driven government contracting intelligence platform.
- Designed backend services and APIs for data aggregation, normalization and delivery to frontend applications.
- Built Elasticsearch-based pipelines, queries, filters and aggregations for complex contract, award and entity datasets.
- Delivered reusable data models and stable API response contracts for frontend integration.

DIAN - Dirección de Impuestos y Aduanas Nacionales | Cali, Colombia

SYSTEMS ENGINEERING INTERN | Feb 2025 - Aug 2025

- Developed technological solutions for critical operational challenges, including solutions deployed across DIAN offices at national level.
- Received three official commendation letters for performance, problem solving and commitment.
- Collaborated with multidisciplinary teams to optimize internal processes and apply software-engineering practices to institutional needs.

EDUCATION

B.S. in Systems Engineering - Universidad de San Buenaventura Cali | Graduated Mar 25, 2026 | GPA: 4.3/5.0

CERTIFICATIONS AND PROFESSIONAL TRAINING

Oracle University: Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate (Feb 23, 2026); Oracle Cloud Infrastructure 2025 Certified Foundations Associate (Feb 23, 2026); Oracle Fusion AI Agent Studio Certified Foundations Associate - Rel 1 (Jun 7, 2026); Oracle Data Platform 2025 Certified Foundations Associate (Feb 16, 2026).

CertiProf: Cybersecurity Awareness Professional Certification - CAPC (valid through Oct 22, 2027); Scrum Foundation Professional Certification (SFPC); Prompt Engineering Foundation; Remote Work; Business Model Canvas Essentials; Professional Diploma in Digital Marketing.

AWS Academy: Cloud Foundations; Machine Learning Foundations.

SENA: App Inventor (completed, 2026); Calidad en el Desarrollo de Software (completed, 2026).

Udemy - AI / LLMs / Developer Tools: The Complete AI Guide: Learn ChatGPT, Claude & Generative AI (41.5 h, Aug 22, 2026); The Complete Prompt Engineering for AI Bootcamp (2026) (22.5 h, Aug 21, 2026); Curso de MCP: Conecta LLMs y Agentes de IA con Apps Externas (8 h, Aug 20, 2026); Curso Completo Claude: Chat, Claude Cowork, Code y más (10.5 h, Jul 23, 2026).

Cisco Networking Academy: Introduction to Cybersecurity; Operating Systems Basics.

Platzi - Technical Training: FastAPI; SOLID & Design Patterns in Python; AI Tools for Developers; SQL Databases; Git & GitHub; Python; Java; HTML & CSS; ChatGPT.

ACADEMIC, RESEARCH AND PROFESSIONAL ACHIEVEMENTS

-
- **Technical Program Committee Reviewer - IEEE CONCAPAN XLIV 2026:** Selected as a technical reviewer and performed peer review of a robotics/manipulation research paper, applying structured technical and scientific evaluation criteria.
 - **Conference Speaker - 5th Departmental Congress of Tropical Agriculture (2026):** Participated as a speaker at Universidad del Valle, Sede Cartago, in the congress "Conciencia colectiva por la sostenibilidad" (Jul 3, 2026).
 - **Published Research - IEEE Xplore / CONCAPAN XLIII 2025:** Co-author of two peer-reviewed papers: "Hybrid AI Architecture for Agricultural Diversification: Deep Learning and Expert Systems Integration in the AgroDiversity Platform" (DOI: 10.1109/CONCAPAN66820.2025.11512437) and "The Environmental Dimensions of Artificial Intelligence: A Multifaceted Challenge" (DOI: 10.1109/CONCAPAN66820.2025.11512472).
 - **Research Presentation - 3rd SAFARIS TECH Congress (2025):** Co-author and presenter of "Artificial Intelligence for Dairy Production Prediction: A Machine Learning Approach"; received an honorable mention and the work was accepted for publication in Revista Tecnológicas.
 - **First Place - Hackathon Empresarial 2025:** Led development of an AI-powered business automation platform, placing first among 20 teams from universities and companies.
 - **Fifth Place - Biohackathon Davivienda 2024:** Recognized for innovation applying artificial intelligence to bioinformatics and sustainability challenges.
 - **Fifth Place - Testlatón 2024 (GreenSQA):** Competitive software testing and quality challenge organized by GreenSQA.
 - **Approved Thesis - Agrosoft CM: Sistema Inteligente de Producción Lechera:** Built a full-stack platform for dairy production prediction and decision support using React, Supabase, PostgreSQL, LSTM, Random Forest and Recharts.

ADDITIONAL RESEARCH / PROJECT HIGHLIGHTS

- **International Paper - CONESCAPAN Honduras 2025:** Author of “AgroDiversity: A Comprehensive Web Platform for Agricultural Diversification in Valle del Cauca, Colombia,” focused on digital tools for sustainable agriculture.
- **Geospatial Gender Dashboard (2026):** Built an interactive analytics platform using React, FastAPI, PostgreSQL/Supabase, Leaflet, Recharts, Docker and public statistical APIs, with an AI assistant using Ollama + LLaMA 3.2.
